

Press Release

March 2010

Over 70 innovations at INALCO 2010 Aluminium Conference

The Netherlands is to host the 11th International Aluminium Conference INALCO 2010 'New Frontiers in Light Metals', to be held at Eindhoven University of Technology in the Netherlands from 23 to 25 June 2010.

Already 70 experts from universities, research institutes and the industry out of 18 countries submitted abstracts on all aspects of light metals for oral or poster presentation. Architecture, Construction, Design, Transport, Automotive, Surface Treatment, Light Metals Technology, Recycling and New Applications are the topics to be considered. An exhibition of new developments and an excursion programme will also be organised. The proceedings of INALCO 2010 will be published during the conference.

This scientific conference is organised by Eindhoven University of Technology and Delft University of Technology, in cooperation with research institutes TNO and M2i, trade association Aluminium Centrum, sponsoring partners Bayards Aluminium Constructions, NEDAL Aluminium, Alcoa Architectural Systems, APT Kurvers and Aluminium 2010, the world's greatest aluminium trade show. The advisory board and the scientific committee will be hosting representatives of leading aluminium research institutes, organisations and industries worldwide.

INALCO 2010 International Aluminium Conference

The aim of the conference is to review progress in the development of aluminium science tools and their application. The objective of the International Aluminium Conference (INALCO) is to present and discuss topics relevant to a variety of products and constructions in aluminium. This is to be achieved by sharing the knowledge and experience of engineers and researchers in a variety of fields. The programme will therefore consist of keynote lectures by invited speakers as well as oral and poster presentations of papers submitted by attendees.

INALCO conferences are highly successful and well recognised by engineers, researchers and scientists from many countries working for research and academic organisations, as well as specialists from many industries, including marine, automotive, transportation and other applications. The first international conference on welded products and constructions with aluminium alloys was held in Cleveland in the USA in 1979 later established as INALCO. Since then these conferences have been held at different venues all over the world every three years.

Information

For further information about programm and registration please visit the web site www.inalco2010.com. If you have any questions, please contact the secretariat by sending an email to info@inalco2010.com.
